SUMMARY

User experience designer specializing in information architecture and role-based workflows for complex platforms, from government portals to financial services websites. I use AI-enabled design workflows to speed up prototyping, then invest the saved time in user research and usability testing to validate design decisions. Delivered high-fidelity Figma prototypes for Kotak and MoneyControl, and winner of the Samsung Design Hackathon (Samsung R&D, 2025).

EXPERIENCE

UX Design Intern, Leaf Design, Mumbai, India (On-site) May 2026 – Jul 2026

- Created user flows, wireframes, and high-fidelity interfaces for client projects, including Kotak Alternate Asset Managers and MoneyControl.
- Translated business requirements into scalable, user-centered design solutions, supporting user research and interaction design.
- Refined prototypes across multiple iterations, incorporating feedback from designers and stakeholders.

Visual Design Intern, Wargstech, Pune, India (Hybrid) Jun 2025 – Nov 2025

- Led the UX/UI overhaul of the Maharashtra Council of Homoeopathy portal across Admin, Practitioner, and Citizen user flows, improving information hierarchy and workflow clarity.
- Streamlined system dashboards to reduce interface complexity and improve task efficiency for end users.
- Worked with government officials from the Maharashtra Medical Council and development teams to align designs with policy and technical requirements.

SELECTED PROJECTS

MoneyControl Digital Platform Redesign | Financial Media Project link

- Reworked core sections of the platform, focusing on information architecture, content discovery, visual hierarchy, and user flows to improve engagement and accessibility.

Kotak Alternate Asset Managers Website | Financial Services, Website UX Project link

- Crafted key sections and user journeys for an investment advisory platform, focusing on content architecture, navigation, and a premium, trust-focused experience.

Maharashtra Council of Homoeopathy Portal Redesign | Government, UX/UI Project link

- Restructured the Citizen, Practitioner, and Admin portals to improve usability and information hierarchy across key user flows.

Avasa: Home Maintenance Automation | Academic Project, UX/UI Project link

- Conceptualized a one-stop platform for home and auto service management, mapping end-to-end user flows from service request to completion.

EDUCATION

MIT Institute of Design, Pune, India Jul 2023 – Present

Bachelor of Design (B.Des), User Experience Design | CGPA: 8.0/10

SKILLS AND LANGUAGES

Design: Visual Design, Interaction Design, Wireframing, High-Fidelity Prototyping, Information Architecture, Design Systems, Accessibility (WCAG), User Journey Mapping

Research and Process: User Research, Usability Testing, Heuristic Evaluation, User-Centered Design, Rapid Prototyping, Design Handoff, Cross-Functional Collaboration, AI-Enabled Design Workflows

Tools: Figma, Framer, Antigravity, Adobe Photoshop, Adobe After Effects, Webflow

Languages: English, Hindi, Marathi

AWARDS AND CERTIFICATIONS

- **Winner**, Samsung Design Hackathon, Samsung R&D (Aug 2025)
- Foundations of User Experience (UX) Design, Google
- Ab Initio: Games as the Origin of HCI, HCI Professionals Association of India (HCIPAI)
